9th Annual MDA EarthSat Conference for Weather Analysts

ROCKVILLE, MD-(August 26, 2010) MDA EarthSat Weather will be having its 9th Annual Conference for Weather Analysts, October 13-15, 2010 in Las Vegas, Nevada. The conference will focus on weather and its application to the energy markets. Conference speakers will cover a wide range of weather-related issues, including natural gas, supply and demand, and the heating season weather outlook for 2010/11. "Conference attendees have an extensive opportunity to exchange ideas, build relationships, and discuss perspectives and strategies addressing critical issues with other analysts and traders in the energy industry," mentions Larry Heitkemper, Vice President of MDA EarthSat Weather.

As with past conferences, the agenda will include presentations with question and answer sessions. To keep things interesting, more casual time is spent with activities such as golf, a CME Group sponsored cocktail reception, a performance of an award winning musical and a tour of a power plant.

The final deadline to register for this conference is Friday, September 10th.

About MDA EarthSat Weather: EarthSat Weather (<http://www.mdainformationsystems.com>) is the leading consulting group for weather risk and commodity weather support in the world. EarthSat Weather maintains a full short, medium, and long range forecast service, provides special reports on key market-moving concerns, and maintains high levels of communication and 24/7/365 consultation with its worldwide client base.
