MDA EarthSat Announces New CME City - Expanding Global Data Offerings

WASHINGTON, D.C. - June 29, 2009 - MDA EarthSat (EarthSat), the world leader in cleaned and enhanced weather data, formally announced that the Chicago Mercantile Exchange Group (CME) commissioned them to provide weather data products for one new Asian city: Hiroshima, Japan. This addition brings the number of CME cities in Japan to three. "We will continue to provide CME Group and our clients the best caliber data. The addition of Hiroshima is a key enhancement to the database," notes Larry Heitkemper, Vice President of MDA EarthSat.

In the past year, the number of CME cities in the United States and Europe has grown to 24 and 10 respectively with the addition of 6 new U.S. stations and one European station. As of today, MDA EarthSat is the official settlement agent for 43 out of 46 exchange-traded CME cities around the world.
